Old Man Mountain Announces Hemlock Fork Packs, FLIP Cages with Fast Mounting System and New Atlas Deck Pack

Old Man Mountain Announces Hemlock Fork Packs, FLIP Cages with Fast Mounting System and New Atlas Deck Pack

Bend (OR), Amsterdam (NL)– 26/02/25 – Old Man Mountain launches its first cargo cages, the FLIP Cages. The FLIP attachment system, which stands for Fast Lock in Place, is seamlessly incorporated into these injection molded nylon cargo cages. If used without a FLIP compatible bag the cages come with an optional cargo foot and have slots for Voile straps like any other cargo cage.

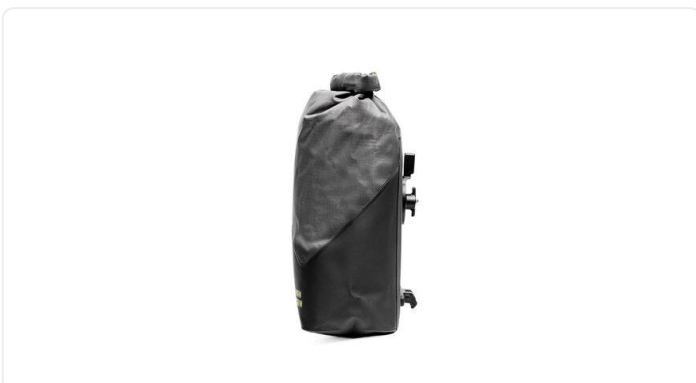

But paired with a bag using Old Man Mountain's new FLIP system, FLIP Cages allow for a fast, secure, and rattle free attachment. Old Man Mountain's first FLIP compatible offering is called the Hemlock; a 7-liter, waterproof bag that can attach with a simple hook of the feet and a 90 degree turn of the handle to confidently lock it in place.

Old Man Mountain has built the cages and bags to be ready for all types of aggressive riding while remaining silent and reliable. Hemlock bags and FLIP cages are rated to 9.9lbs (4.5kgs) per side. The bottom half of the bags are made from durable and abrasion resistant Hypalon where they are likely to encounter rocks and brush while the top are made from a lightweight ripstop for better compression while also reducing weight.

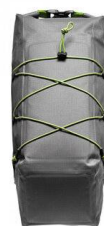

Hemlock with FLIP Cages will be available as a pair of two bags, two FLIP cages, and two cargo feet for \$175.

FLIP Cages will also be available without the Hemlock bag for \$80 per pair.

To complement these new fork packs, Old Man Mountain is also launching the Atlas Deck Pack. This 9-liter dry bag is purpose built to mount to the deck of a rack with built-in attachment straps that hold the bag in place but still allow easy access to your gear inside the bag. The top of the bag features a criss-crossing bungee for quick and easy stashing of a jacket, sandals, or some bulky snacks from the last resupply.

Similar to the new Hemlock bags the bottom of the Atlas Deck Pack is made from durable and abrasion resistant hypalon while the top is made from a lighter, more malleable ripstop. The Atlas Deck Pack steps up as the perfect seat pack alternative, lowering the center of gravity of what you carry, allowing full use of a dropper, and coming in at a svelte 275g!

While Old Man Mountain loves their own bag designs, they know that they serve a specific need and will not be for everyone. This is why Old Man Mountain is making FLIP cages and hardware available as an OEM product to any interested bag makers, big and small. If you are a bag maker and would like to offer FLIP cages and hardware to your customers you can learn more and contact OMM here: <https://oldmanmountain.com/flip-hardware-explained/>

Hemlock Specs

- 7 Liter capacity per bag
- Fully welded and waterproof construction made from TPU fabric
- Hypalon® reinforcements are more abrasion resistant and provide structure to the bags
- PFAS/PFC free materials
- Roll top enclosure is easy and reliable
- Lightweight
- Hemlock = 333g (each), 666 grams per pair.
- FLIP Cage weight: 93g (each), 139g with optional foot.
- RRP: Hemlock w/ FLIP Cages (pair) \$175

FLIP cages

- Detachable Cargo Foot
- Strap slots
- 215mm x 62mm & 93g x cage without Cargo Foot
- 240 mm x 62mm & 139g x cage with Cargo Foot
- RRP: FLIP Cages (pair) \$80

- Quick Stash Bungee

- Silent Mounting Straps
- 100% Waterproof
- Made from 210-D Ripstop Nylon with a TPU base and fully welded seams. You'll never worry about river crossings or sudden rain again.
- RRP: \$95

About FLIP technology

FLIP (Fast Lock in Place) is the first fork pack mount and cargo cage in one. The Hemlock Bag mounts to FLIP cages with an easy hook of the base and a 90 degree turn of the handle. FLIP Cages are versatile cargo cages that work with any bag or bottle when using the included, removable cargo feet. Like all OMM products they are secure, silent, and ready for any riding condition.

About Old Man Mountain

Old Man Mountain was born from the need to mount racks on bikes without traditional mounting points. This started with QR skewer-mounted racks, and has evolved into a full line of optional Fit Kits for Thru Axle, or QR Skewer mounting racks on any bike. The products are tested and trusted in the most extreme environments on earth. Old Man Mountain racks have helped riders traverse Iceland in bitter cold winters, carried the gear of countless GDMBR riders, and circumnavigated the globe. The only remaining question is where will it go with you?
