Lemmo One Urban Edition

Lemmo One Urban Edition

Meet the Lemmo One Urban Edition: The Ultimate City Commuter

Designed for effortless city rides, the Urban Edition combines cutting-edge tech with everyday comfort. At its core is Lemmo's signature **E+ Technology**, featuring the **Smartpac** and **Dual Mode Hub**:

Smartpac – The Heart of Lemmo One

The **Smartpac** is a removable, all-in-one unit that houses the **motor controller, IoT connectivity, GPS, power bank, and a powerful 540Wh battery**. Its modular design makes maintenance and upgrades effortless—simply swap the Smartpac for the latest tech instead of replacing the entire bike. Plus, it doubles as a **portable power bank**, so you can charge devices on the go.

Dual Mode Hub – Ride Your Way

Switch between **e-powered riding (40Nm torque silent motor) and manual pedalling** with a single shift, thanks to the **Dual Mode Hub**. Whether you want an effortless electric boost or a lightweight, drag-free ride, the choice is yours—giving you the best of both worlds.

Advanced Security

Stay protected with **e-locking for bike and for Smartpac, GPS tracking, an alarm, and Apple Find My integration**.

What makes it truly city-ready?

- **Upright Riser Bars** – A 20° more vertical position for relaxed, comfortable riding.
- **Stealth Suspension Seat System** – Smooths out bumps for a gentler ride.
- **Downtown Grey Finish** – A sleek, glossy colour that blends effortlessly with the urban landscape.

Available in **ST (step-through), L, and XL** sizes, with **belt or chain drive** options to match your style.

The Lemmo One Urban Edition is built for the streets—**ride smarter, ride longer**
