

## URBAN ARROW FamilyNext

### Benefit

At Urban Arrow, we focus on the rider and their needs as family transport is more than just getting from A to B, it's about enjoying the ride together. As our bikes become serious car replacements, the need for features that ensure a smoother ride has become increasingly important.

### Aesthetics

The Urban Arrow FamilyNext is set to revolutionize family transport with its sleek design, innovative safety features and best equipment for comfort. Its rounded silhouette and elegant details make the FamilyNext a sophisticated masterpiece wherein sleek design meets dynamic looks.

### Ergonomics

The Urban Arrow FamilyNext is designed with the highest attention to ergonomics, ensuring comfort for both the rider and passengers. The adjustable saddle and handlebars accommodate riders of different heights, while the higher backrest and updated seatbelt system ensure that little passengers are comfortable and secure.

### Quality

The Urban Arrow FamilyNext offers a buttery-smooth ride, thanks to the integrated suspension front fork and a low center of gravity for stable handling. Build to the highest standards, it is equipped with the best of the best components from our trusted, premium partners in the biking industry.

### Innovation

The FamilyNext features a redesigned box and protection tube, which not only add to the cargo bike's streamlined look but also enhance durability and safety. With the integrated reflective elements that can be swapped for design LED lights, the FamilyNext revolutionizes visibility.

### Sustainability

At Urban Arrow, we aim to build bikes that last and spread them worldwide, making cities cleaner, quieter, and more livable. We're not just selling a bike, we're selling a growing sentiment: I don't need a car. With a focus on lasting quality we ensure our cargo bikes are built for a lifetime of use. Our newest cargo bike is a testament to this dedication.
