

BLACKHEART^{BIKE CO.}

ROAD PLUS Ti

Sibling to the Road Ti, which won 2024 Cyclingworld Best Race Bike, the Road Plus Ti takes everything people love about our road-specific model and blends it with the versatility of our classic Allroad Ti model.

With 700x42mm tire clearance, this bike transforms from an aerodynamic, all day road bike to a gravel race bike simply by switching the wheels (size 60 shown with 32mm and 40mm tires).

Unique to this model is a 3D printed seat tube cut out that allows for 700x42mm tire clearance while running fenders. Other 3D touches include a BB shell with extra clearance for rear brake hose routing, chainstay brake hose port with flared internals for easy routing, and new rear dropouts with integrated fender/rack mount.

Features

- 100% recyclable premium 3/2.5 double-buttet titanium tubing
- 3D-printed updates that enhance real-world usability
- Design language and proportions that echo modern carbon design
- Custom kammtail aero down tube and ovalized top tube
- Curved seatstays with fender/rack mounts
- Removeable direct mount front derailleur hanger
- FSA ACR headset allows for integrated and non-integrated bar/stems
- 2x/1x electronic and 1x mechanical compatibility
- SRAM UDH / direct mount compatible
- 9 sizes to fit more riders better
