

# Fara Gr4

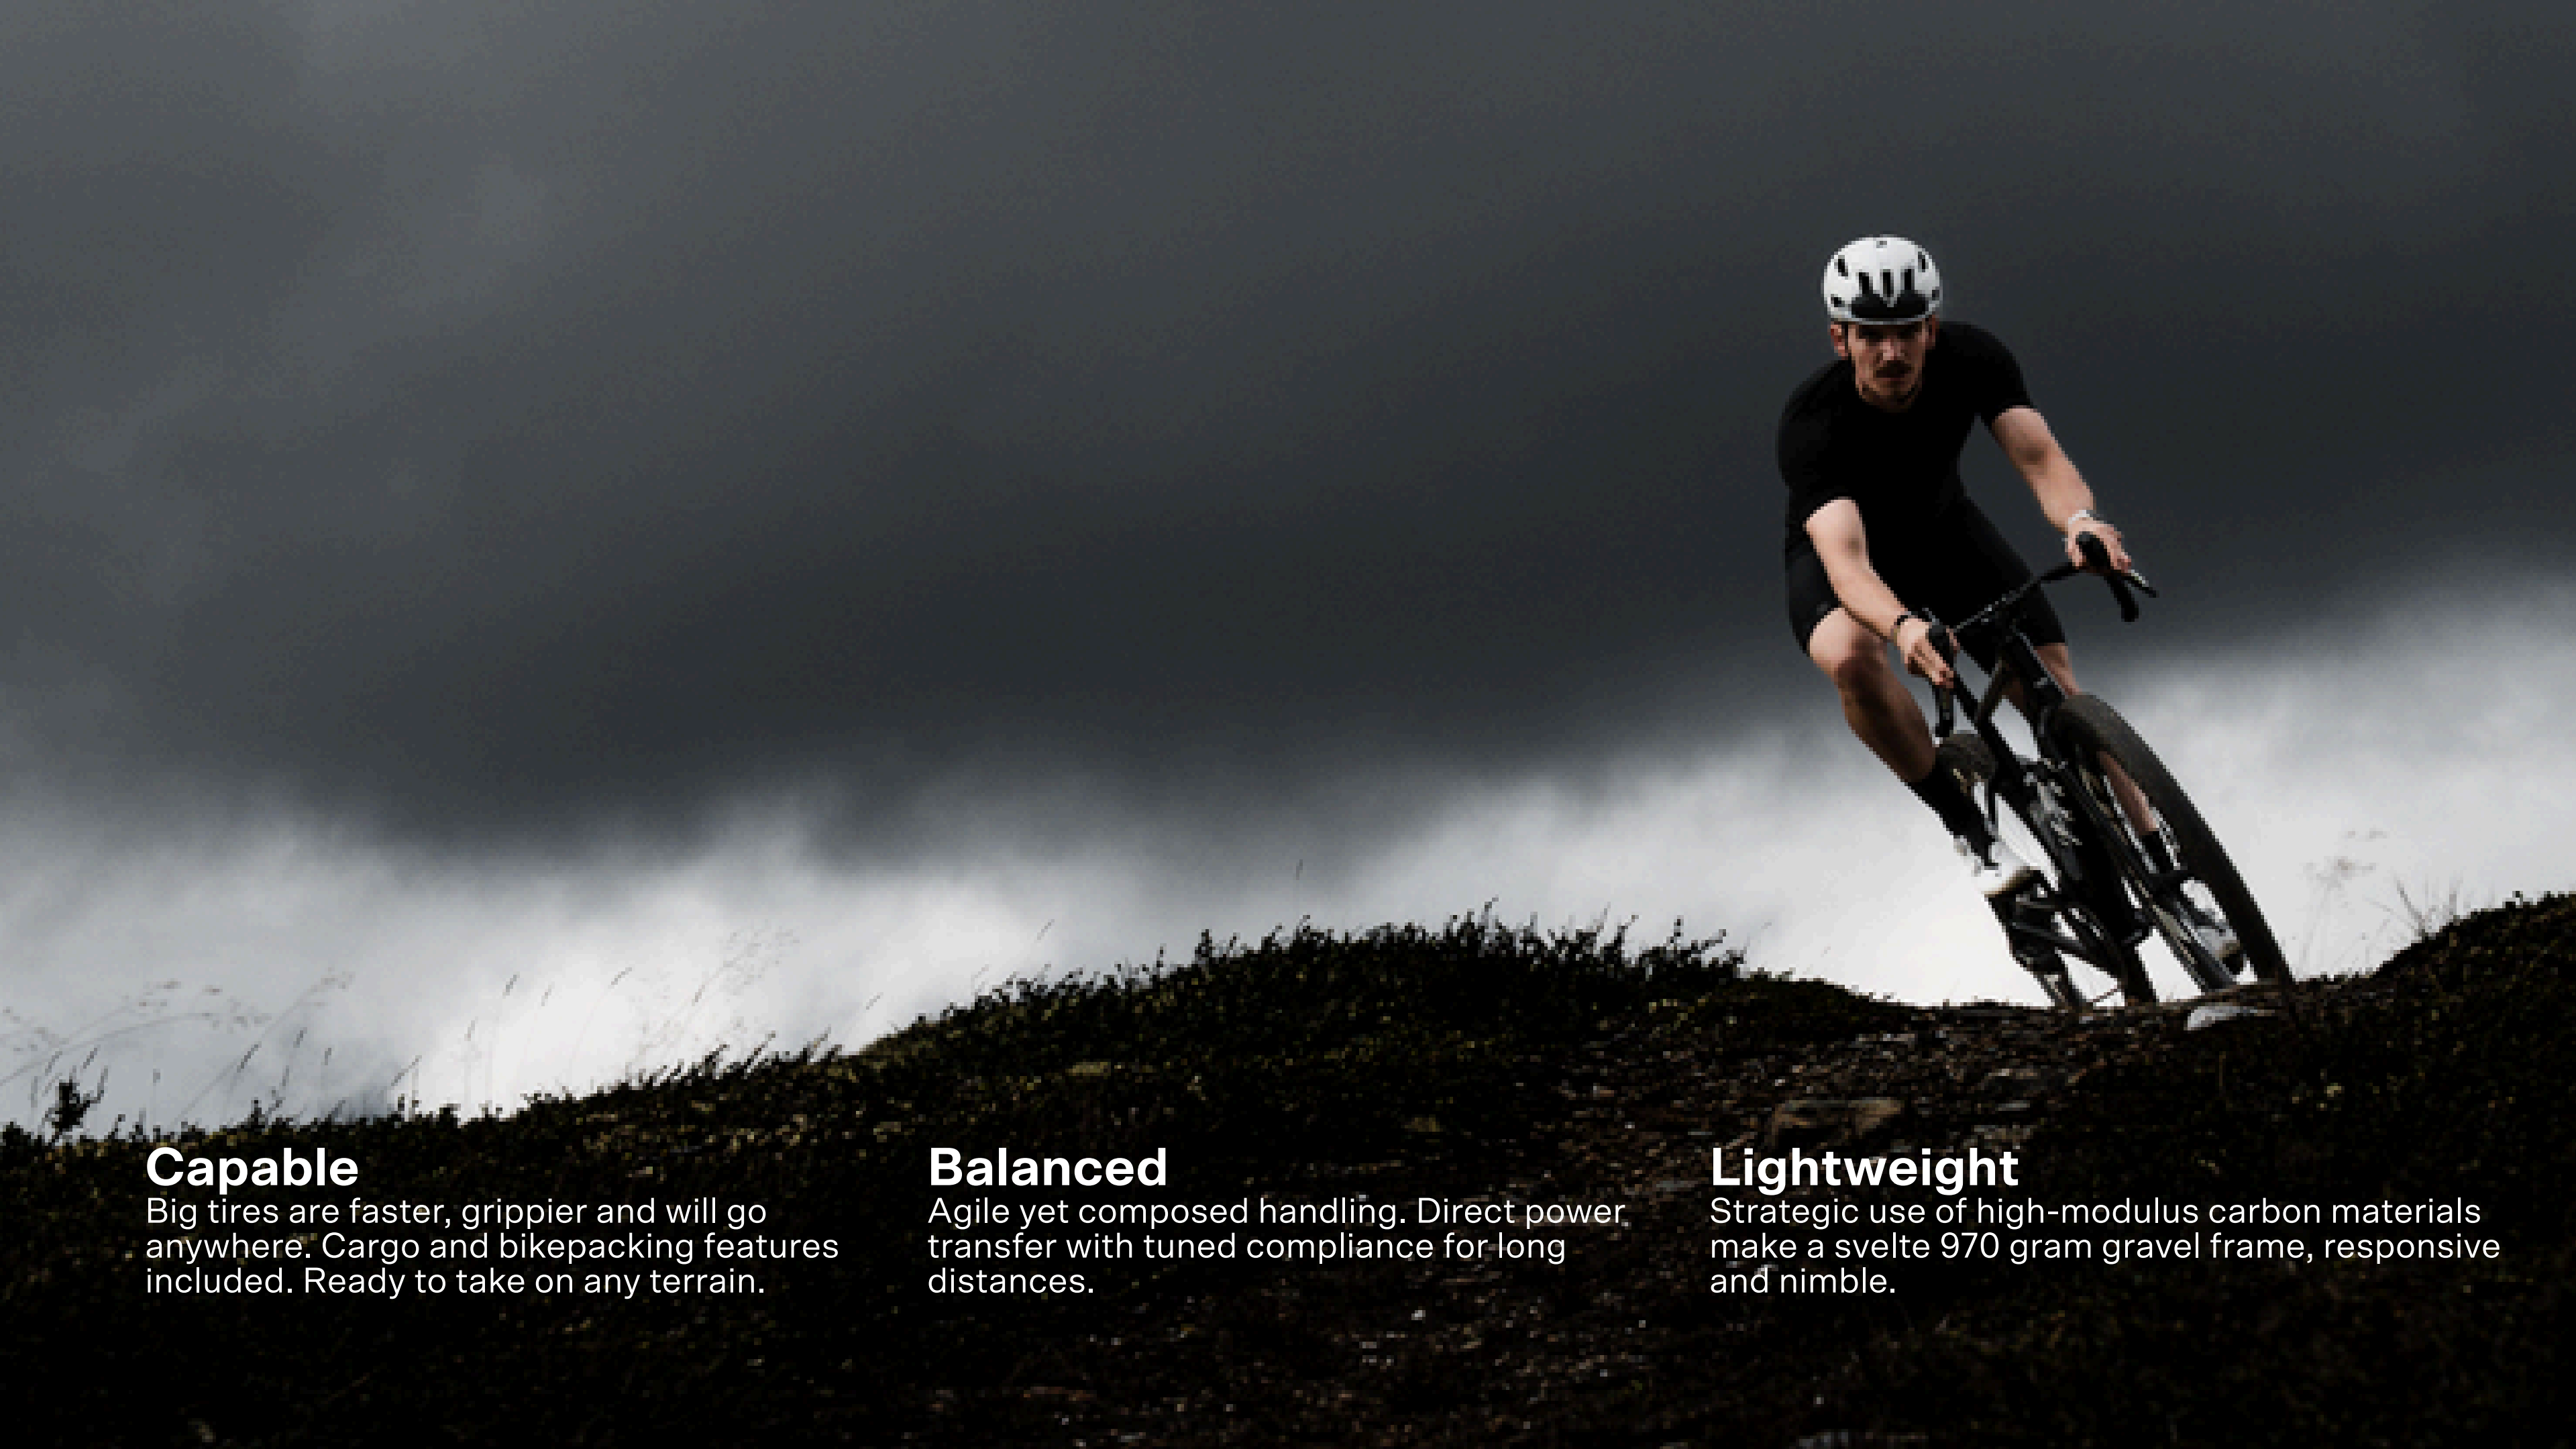

100% Performance  
100% Adventure

“The gravel bike that ticks all the boxes.”

**FARA**<sup>®</sup>  
CYCLING

The new Gr4 was designed from the ground up with a unique aim: Going fast over the roughest terrain - and excelling at every day adventures. For us, a gravel bike is not just “a road bike with bigger tires”. It is so much more.

## Capable

Big tires are faster, grippier and will go anywhere. Cargo and bikepacking features included. Ready to take on any terrain.

## Balanced

Agile yet composed handling. Direct power transfer with tuned compliance for long distances.

## Lightweight

Strategic use of high-modulus carbon materials make a svelte 970 gram gravel frame, responsive and nimble.

# Key Features

- ✓ Massive tire clearance
- ✓ Light weight
- ✓ Intuitive gravel geometry
- ✓ Bikepacking mounts
- ✓ Great looks

High modulus carbon frame for shock absorption and low weight.

Fara Modular Cockpit for optimal ergonomics.

Dropped chainstays for rear-end compliance.

Big tires for speed, grip and comfort.

## Gravel Performance Adventure Frameset

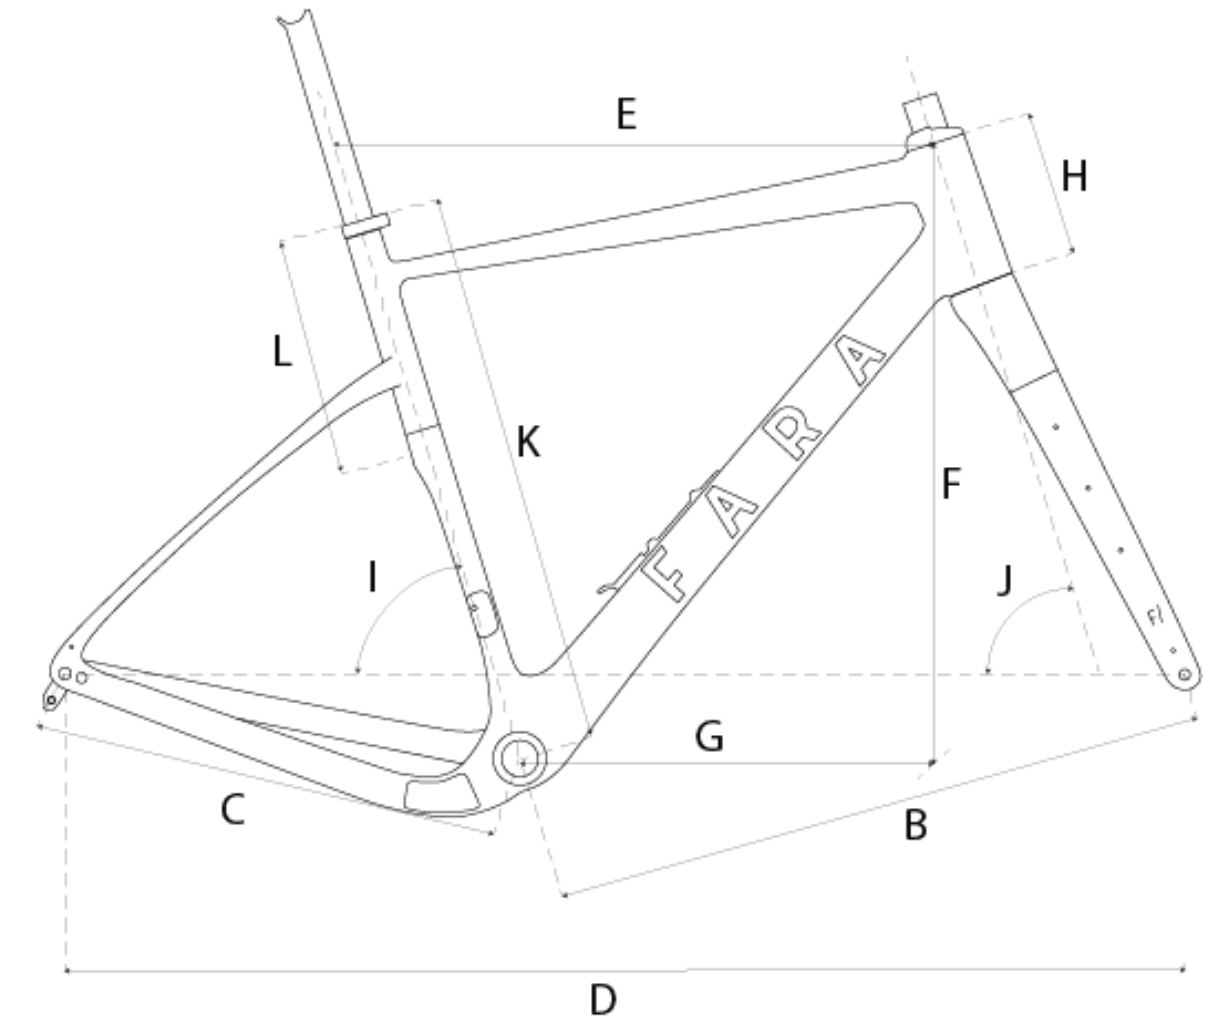

A 970g carbon fiber frame strategically utilising advanced high-modulus materials to lower weight and increase stiffness.

Paired with massive 2.2” MTB tires and the ergonomically optimized Modular Cockpit, this frameset delivers exactly what gravel racing and off-road exploration demand: speed, comfort, and control.

## Intuitive Gravel-Fit Geometry

Designed for speed, comfort, and control over challenging terrain. The Gr4's geometry strikes the perfect balance between responsiveness and stability, making it ideal for long days in the saddle.

## Details

- Robust, carbon fiber frame and fork
- 970g frame-only weight (Size M, no paint, no hardware)
- High modulus Torayca M40J carbon fibers
- UDH Rear derailleur compatible
- Fully internal cable routing
- Internal Stash Hatch storage
- Updated Fara Cycling Integrated Bikepacking System
- Curved Seat-Stays for increased comfort
- Tire clearance, up to 700x57mm (2.2")
- Round, 27,2mm Seatpost
- Intuitive Fit geometry - 4 sizes to fit nearly every rider
- T47, 85.5mm Bottom Bracket standard
- Stealthy integrated Fender Mounts
- 2x triple Fork Cargo Mounts
- Front and rear Direct-mount disc brake for 160mm rotors
- 12mm Through-Axles
- Front Derailleur mount (for chain guide only)
- 1x drivetrains only, mechanical and electronic shifting
