

# SmartLock

The 2Lock smart lock is integrated into the hub, locking the axle and hub. It can't be broken open as the bolt is inaccessible from the outside.

# Human Voice Alarm

The alarm with a human voice gives the thief maximum attention and stress.

# Labeling

If all components are digitally locked, the "I've been stolen" message stays and the bike can't be sold.

# Bike Replacement

If the bike is stolen anyway, we will replace it with our optional service.
